## FOR STUDENTS

### GLOBAL LEARNING OPPORTUNITIES

KLTS uses online platforms to make it possible for K-12 students to travel the world virtually. They connect beyond the classroom to participate in sessions such as Mystery Skypes, Classroom-to-Classroom Collaborations, Virtual Field Trips and Guest Speakers (*with MSFT Global Connect*).

As a result of these live lessons:

- ◆ Students become “global citizens” by interacting with peers in other countries.
- ◆ Students learn about other cultures and develop empathy and kindness (which can help address bullying).
- ◆ Global learning is made easy for teachers, because KLTS provides the activity plans and facilitates the sessions.
- ◆ The technology enables students to learn in core subjects without leaving the classroom – meeting ISTE standards.
- ◆ Schools save money, by not having to hire additional staff, and avoid the escalating liabilities and costs of field trips.
- ◆ This technology addresses the need for schools to develop global skill sets for K-12 students.

Global learning meets the needs of every student as stated in the Every Student Succeed Act (ESSA).

## FOR FACULTY AND STAFF

### RESILIENCE AND HAPPINESS WORKSHOP

This workshop experience gives your teachers (and staff) an opportunity to take a break from the “busy-ness” of their lives and *refuel*. They will discover tools and techniques to release stress, become more resilient, and increase their happiness!

As a result of this workshop, participants are able to:

- ◆ Identify their “happiness setpoint” and know how to raise it.
- ◆ Understand the science behind creating a positive mindset.
- ◆ Use specific tools to release stress and debunk stressful thoughts.
- ◆ Become more resilient and develop their emotional strength.
- ◆ Assess their key beliefs and behaviors in relation to those that lead to happiness.
- ◆ Transform limiting beliefs into empowering ones.
- ◆ Take inspired action toward their goals – and achieve amazing results in their personal and business lives.

Since happiness is contagious, the positive energy and mindset teachers gain also influences the experience of their students.

**ANN MARIE GRAMC**

*Employee Happiness Consultant*
